

## Illumination of Matsushima

From the main illuminated area Entsuin and the entrance path to Zuiganji to Kanrantei, you will be dazzled by lights that enhance the glamour of autumn leaves at night. There is nothing more gorgeous than this illumination that will make your night-stroll so rewarding. The most exciting spot of the illumination is the pond of Entsuin which reflects the autumn-colored trees like a mirror.

Just seeing the pond will feel like being gravitated deep into another world.

Bamboo lights lined up at the entrance path to Zuiganji are also amazing.
